

Scymaris Ltd

Our foundation is a heritage of over 75 years' experience in serving the global pharmaceutical, agrochemical and chemical industries. Our modern, world class facility and state of the art laboratories as well as unique access to marine species in Brixham, Devon, means we can provide a turnkey solution for GLP and non-GLP Environmental Risk Assessment requirements.

We provide services in:

- Ecotoxicology (freshwater and marine), Environmental Fate/ Metabolism & Biodegradation, and Analytical Chemistry
- Endocrine disruptor testing, including FSTRA Daphnia repro/ FSST/FFLC/FELs/AMA. As well as validating LAGDA/XETA/ZEOGRT/ MEOGRT.

- Services in lower and higher tier Environmental Fate studies with radiolabel expertise
- State of the art analytical equipment for substance characterisation, Metabolite ID, and complex compounds analysis
- Regulatory testing according to GLP, OCSPP, ISO, OSPAR and licensed to work with radiochemicals (14C & 3-H)

As a dedicated environmental testing laboratory, we bring together expertise across all disciplines to ensure that our testing strategies are adapted to the challenges of today's new chemistries. This includes poorly soluble, UVCB, volatile or unstable, natural products, and difficult to analyse substances.

WSP in the UK

At WSP, we understand that chemical companies face wide-ranging challenges. These often include regulatory and safety compliance, changes in demand, digitisation and the strive for more cost-effective production methods. With over 15 years' experience in the industry, WSP assists clients in tackling these challenges – throughout the lifecycle of an asset or project.

Registration Services

Having been involved with REACH since its 2007 EU inception, WSP offers both EU and UK-REACH Only Representative (OR) services. This involves helping companies maintain compliance of their registrations following any change in requirements. These often come in the form of compliance decisions from ECHA & HSE, such as the need for additional data, or following the inclusion on the SVHC, Authorisation or Restriction lists.

Our specialist team also provides a full range of services to help companies fulfil REACH endpoint requirements, including independent study monitoring, read-across and QSAR.

Supply Chain Management

WSP can act as a trustee to ensure supply chain anonymity and protect intellectual property. We can also conduct supply chain audits, ensuring compliance through registration or OR coverage.

GHS / CLP Services

With extensive experience in the classification and labelling of products, WSP provides SDS and label authoring services as well as Poison Centre & SCIP database notification facilities. We additionally have experience in the classification of complex mixtures and new substances from first principle data.

DGSA Services

The WSP team offers a Dangerous Goods Safety Advisor (DGSA) facility and has provided DGSA services to clients for many years. This includes conducting audits of companies and sites, identifying areas for improvement and providing recommendations to achieve regulatory compliance. Our safety centre of excellence also offers a full package of safety services, including, workplace safety, COSHH, fire safety and process safety.
