

fertilising product. In 2024, a first batch of standards will be harmonised for use under the FPR.

(4) What bottlenecks should you overcome?

A compliance check is recommended to verify if all ingredients from your Fertilising Product can be brought under one of the current available 15 CMCs. When from a definition point of view such tailored fit exist, the next step is to evaluate if the ingredients meet the defined requirements and quality criteria for the particular CMC. If it appears impossible to meet the criteria, then an applicant can request for an additional CMC category, or request to amend definitions and/or add new quality criteria. In any case, it is important to make a thorough evaluation on the best strategy how to proceed. Knoell can bring light in the tunnel.

For help in the regulatory world for product registration and certification in EU countries and outside, please contact the Knoell Crop Protection & Nutrition Team cropprotection@knoell.com and Dr Jayne Harris, Group Lead Crop Protection & Nutrition jharris@knoell.com
