

Beamex

A better way to calibrate – Since the establishment of Beamex in 1975, the company has focused strongly and consistently on calibration. Beamex is a technology and service company that develops, manufactures and markets high-quality calibration equipment, software, systems and services for the calibration and maintenance of process instruments.

The company is a leading worldwide provider of integrated calibration solutions for improving quality and efficiency. Beamex offers a comprehensive range of products and services—from portable calibrators to workstations, calibration accessories, calibration software, industry-specific solutions and professional services.

Through Beamex's global and competent partner network, Beamex's products and services are available in more than 80 countries. Beamex is certified in accordance with the ISO 9001:2015 quality standard. Over

forty years of experience in manufacturing and developing calibration equipment and systems, close co-operation with customers that have high requirements and uncompromising quality standards, shared by the people working at Beamex, are things that have made Beamex's calibration solutions world-class. As a proof of Beamex's success, there are more than 10,000 companies worldwide utilising its calibration solutions.

Beamex's ISO 17025 accredited calibration laboratory is accredited and approved by FINAS (Finnish Accreditation Service). FINAS is a member of all Multilateral Recognition Agreements / Mutual Recognition Arrangements (MLA/MRA) signed by European and other international organizations, i.e. European co-operation for Accreditation (EA), International Laboratory Accreditation Cooperation (ILAC) and International Accreditation Forum Inc. (IAF).

Pumptec Engineering Services

Pumptec Engineering Services, based in Bromborough in the Wirral has nearly 20 years experience with the North West Chemical Industry. From site work to embedded personnel to full overhauls we specialises in supporting industry with the inspection, repair, overhaul and fitting of all types of rotating equipment. Our highly trained engineers are all mobile and are able to support a myriad of tasks whether that is your routine maintenance, your critical issue call outs, or your planned shutdowns.

For the deeper repairs we have our Wirral based machine shop that can complete

overhauls on your pumps, fans, motors and mixers. This can either be on a collection only basis or on a remove, inspect, overhaul and re-fit basis.

Further service lines we offer are HVAC, chillers and refrigeration via our sister company Setaria.

We are proudly independent so have access to the full marketplace for manufacturers and spares. Our service and quality is underpinned by ISO9001, 14001 and 45001 meaning that you can be confident that we will meet your requirements.
